

Information for the City of Warren

Champion Meter Pit

Trumbull County Sanitary Engineers

March 14, 2018

As stated in the March 9, 2018 email from Bill Durst to Bob Stahl the Trumbull County Sanitary Engineers Office would have no objection to continue using the City of Warren Champion Meter Pit readings for billing purposes until the issues with this meter pit are resolved. The Trumbull County Sanitary Engineers Office would agree to share in the cost of resolving the issues with the City of Warren Champion Meter Pit. We would agree to a 50/50 split of the cost per the language in the expired Agreement. Our office would propose the first effort made would be to block all incoming flow to the meter pit and evaluate the existing conditions of the meter pit. It may be possible to rehabilitate the existing 24 inch Parshall flume which would provide adequate and accurate metering capability. Our office would offer to assist in this effort as we have the equipment and sub-contractor to perform this investigation. I would suggest a meeting to further discuss this proposal.
